Hiring Manager New York State Parks, Taconic Regional Office, 9 Old Post Rd, Staatsburg, NY 12580

Dear Hiring Manager,

I am writing to express my interest in the IT position within the New York State Parks department. With a solid background in technology troubleshooting for both hardware and software, and extensive experience in various computer languages and hardware, including computers, prosthetic limb technology, and circuit boards, I believe I am well-equipped to contribute to your team.

One of my proudest achievements in the tech field was developing a new maintenance technique for prosthetic limbs at my previous job at Unlimited Tomorrow, which significantly improved their functionality and user satisfaction.

During my time at Mills-Norrie State Park, I have enjoyed my role in maintenance and practical problem-solving. I am particularly drawn to the IT department at New York State Parks because of my passion for the work I currently do and my eagerness to apply my tech and computer science skills to their fullest extent. My goal is to continue serving the New York State Parks while embracing new challenges and utilizing my expertise to enhance the efficiency and effectiveness of the IT operations within the parks.

I genuinely love working for the NYS parks and am excited about the possibility of combining my technical skills with my dedication to public service. I am confident that my experience and enthusiasm make me a strong candidate for this position. I look forward to the opportunity to discuss how my background and abilities align with the needs of your team.

Thank you for considering my application.

Sincerely,

Logan Cooper
